

Better Buildings for a Better Tomorrow

Building performance experts since 1998

kW Engineering is an independent consulting firm focused on improving the performance of the built environment. We deliver well-engineered solutions that lower costs, optimize energy use and operations, and help achieve carbon reduction goals.

At kW Engineering, we work with grocery stores of all sizes, from big box retail to convenience stores, providing custom tailored solutions to meet every customer's needs. We work within your budget, starting with low-cost and no-cost adjustments before recommending more capital-intensive measures. We partner with local utilities to deliver eligible rebates and incentives.

Our "Boardroom to Boiler Room" Approach

We connect strategy with day-to-day operations by linking decision-makers, facility staff, and trades teams to turn energy goals into practical, real-world results.

Services We Offer

Energy Audits

On-site inspection and data analysis to uncover cost-saving opportunities across your portfolio.

Retro-Commissioning

Low-cost operational improvements to existing buildings with short payback and significant energy savings—no equipment replacement needed.

Decarbonization & Electrification

Strategic roadmaps to lower GHG emissions while improving reliability and comfort.

Benchmarking and Reporting

Portfolio benchmarking and targeting through GridGauge, our building intelligence software for tracking meter data and prioritizing opportunities across stores.

New Construction Commissioning

Startup quality assurance so your new building performs as designed from day one.

Monitoring-Based Commissioning (MBCx)

Fault detection and diagnostics via our building analytics platform for portfolio-scale savings.

Demand Response (DR)

Strategies for Demand Response, plus hands-on support participating in utility driven DR events. Leverage utility incentives to maximize revenue without risking product.

Strategic Energy Planning

Long-term energy management strategy tailored to your facilities and goals.
